# Converting Fractions to Decimals

To convert a fraction into a decimal, we divide the numerator by the denominator.

EX: $\dfrac{3}{8}$   $8\overline{)3}$  $= 0.375$

**Note:** You can also use a calculator to help you.  On your calculator to convert 3/8 to a decimal you push 3 divided 8 equals.

Try these

$$\frac{4}{7}$$

$$\frac{6}{9}$$

$$\frac{8}{12}$$

$$\frac{12}{99}$$

$$\frac{17}{19}$$

$$\frac{43}{99}$$
